

Online sources att:online-sources

itemize

<http://xrg12.projekty.ms.mff.cuni.cz:58080/appgen> — a live instance of LinkedPipes Application Generator.

<https://github.com/ldvm/LDVMi> — repository with LinkedPipes Visualization source code (originally named as LDVMi)

<https://github.com/tobice/LDVMi> — the latest version of the code. This is a repository forked from the original LinkedPipes Visualization repository. It contains sources of both LinkedPipes Visualization and LinkedPipes Application Generator.

<https://github.com/tobice/vocabulary> — LDVM vocabulary plus examples of LDVM components (including those required by the application generator).

<https://github.com/tobice/appgen-datasets> — mirror of the sample data sets that have been used in this thesis to demonstrate the generator abilities.

<https://github.com/tobice/thesis-text> — sources of the text of this thesis are available on GitHub.
